Academic Career Development Programme

Advance your skills and shape your research career

You are pursuing an academic career and want to advance your skills to meet the challenges of your everyday research environment? You want to further develop your role as a (prospective) research group leader, acquire progressive leadership and management skills and benefit from direct exchange with your peers?

Then take part in the »Academic Career Development Programm« jointly organised by Heine Research Academies. The interdisciplinary programme supports your personal career in academia and facilitates training in a small, set peer group. A certificate confirms the successful participation in the programme.

Target group

The Academic Career Development Programme is a training and continuing education programme for advanced postdoctoral researchers seeking an academic career. The participants have an own research project and are

- junior research group leaders
- Junior Professors

Objectives of the programme

The Academic Career Development Programme aims to further professionalize the management of your everyday research environment and prepare you for (future) management tasks in research. During the programme you will reflect on your personal capacity as a leader in research and actively extend your skills.

The programme is designed for a limited group of likeminded professionals that are or soon will be on their way to full research independency. You connect with your peers and

discuss with each other on equal footing. The workshops and networking sessions are set up to further enhance your understanding of the research system in order to make use of it for your personal career. This leaves you well prepared for upcoming challenges and allows more time for your actual research.

Areas of advanced competence development

- Career development by strategic research funding
- Leadership skills, leadership personality, managerial responsibility for researchers
- Team assembly and team leadership, team moderation and motivation in international research teams and collaborations
- Optional topics: professional teaching; advanced project management; communication skills; conflict management; application for a faculty position/professorship

Programme formats

- **Workshops:** 1-2 day trainings, within the set group of 10-12 participants
- **Peer Coaching:** coaching in small peer groups concerning individually chosen topics, 4-6 peers of the group
- **Networking events:** panel events with networking possibilities, e.g. HeRA Werkstatt

General conditions

The Academic Career Development Programme is a (up to) 1,5 yearlong certified programme of Heine Research Academies at HHU. Participation is free of charge for HHU members. Attendance is required for the entire term. The current programme information is available on the programme website.
