

## Dr. Anitha Thillaisundaram, University of Lincoln

Nationality  
Malaysia

Stay at HHU  
10/2013 - 09/2016

Cooperation partner at HHU  
Professor Benjamin Klopsch

### Institute of Mathematics

#### Research Interests

My research interests lie in group theory, which is a branch of algebra. I am interested in infinite groups such as profinite groups, and also finite groups of prime power order. In addition, I'm also interested in number theory, combinatorics and knot theory.

#### Research Experiences

After my PhD, I was a postdoc at the Harish-Chandra Research Institute in Allahabad, India. Then in 2013, I was a postdoc at the Otto-von-Guericke Universität Magdeburg before coming to the Heinrich-Heine-Universität. As of September 2016, I have a lectureship in algebra at the University of Lincoln.
